Allen Island Classroom – Using the projection system.

The classroom is equipped a large format Vizio Display Connected to an Apple TV.

Controls for the Apple TV and display are located on the window sill near the front of the classroom. Press the power buttons on both controls to turn on both devices.

Two options for connecting the display:

1) Direct connection – Plug in the HDMI cable into an open HDMI port in the back, lower left corner of the Vizio display. Connect the other end of the HDMI cable to your computer (you will need an HDMI port or adaptor). Using the Vizio remote, change the input to the HDMI port of the cable.

2) Wireless connection – connect via airplay using an Apple product.

   a. Check that the Apple TV power light is on (small black box mounted to lower left corner of display)
   b. The Apple TV is connected to the display using an HDMI cable plugged into port HDMI 1 or HDMI 2 (you can look behind the display to see the plugs).
   c. Using the Vizio remote, change the input to the HDMI port of the Apple TV. You will see the Apple TV menus appear on the display – this confirms that you have selected the correct input port.
   d. On your Apple device (laptop, iPad, or iPhone) select Screen Mirroring and select Classroom. The display will now mirror the display of your Apple device. The first time you connect, the display will prompt you to enter a security number to enable mirroring.
