1. Content
The metabolic disorder was put into biochemical context. The pathway was clearly explained, the role of this enzyme in the pathway was clearly explained, and the symptoms were explained in terms of the enzyme, the pathway, related pathways of metabolism, and the tissues/organs affected.

2. Organization
The presentation was well organized and flowed logically from one point to the next. It made good use of the allotted time (11 – 13 minutes) and was neither too short nor too long. Additionally, the presenters were ready to go on time and seemed on top of things.

3. Engagement
The presentation was interesting, informative, and engaging. I enjoyed learning more about this topic.

4. Quality of Slides
The slides were attractive, informative, and easy to read.

5. Presentation
The presenter spoke well (loudly, clearly, and had a good rapport with the audience) and contributed equally to the presentation.
