

ARI38 / Introduction to Digital Imaging
Professor Gary M. Green
Spring 2012

ASSIGNMENT #1 / Scanning Nature: Part Two

For Part two of this assignment you will create a total of 6 designs/artworks using your scanned objects from nature.

With scans of your collected objects, create six finished designs. The canvas size of each image should 5x7" at 300 dpi. The six pieces of work should be a response to the following design concepts/ideas:

- 1) Figure/Ground
- 2) Positive and Negative Space
- 3) Symmetry
- 4) Repetition
- 5) Continuation
- 6) Your Choice

Once you've created the designs, you will post each to your web site using a gallery or assignment page. Please feel free to contact Ellen Freeman with questions about the posting part of the assignment and me with any questions about the creative and technical aspects of creating the works.

Your finished works should be posted to your web sites by September 27 at the beginning of class.
