7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.

   Strongly agree
   Comments:

8. Overall, the instructor's teaching in this course was effective.

   Strongly agree
   Comments:
Great instructor. Will definitely take courses with him again. Made me love math again!

**Question(s) Created by the Instructor for Individual Use**

**How has this course changed your perception of mathematics?**
This course has made mathematics seem easier to grasp and more interesting to work with.

**What aspects of the course contributed most to your learning?**
the instructor's habit of posing questions in class and allowing us to answer, weekly homeworks, and daily homeworks.
Which one of the following factors most influenced you to take this course?
Fulfillment of an all-college area requirement

What grade do you expect to receive?
B

What is your class standing?
First year

What is your sex?
Male

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Strongly agree
   Comments:

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Agree
   Comments:

3. The workload and pace of this course seemed appropriate.
   Agree
   Comments:
   Always a fair amount of homework due at the end of the week.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Agree
   Comments:
   Always on time.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Agree
   Comments:
   His teaching is good for the course. I learned and he communicates effectively.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:
   Office hours always posted and weekly sessions in calculus after hours. Very helpful.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
   Neither agree nor disagree
   Comments:
   Teaching assistants grade most of the homework. He grades the tests, which seem to be fair and useful.

8. Overall, the instructor's teaching in this course was effective.
   Strongly agree
   Comments:
   I have successfully learned calculus in multiple variables.

You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.
Thank you for the class!

Question(s) Created by the Instructor for Individual Use

**How has this course changed your perception of mathematics?**
I learned I do not hate mathematics but I do not love them either. This was a bearable course for someone who is not the biggest fan!

**What aspects of the course contributed most to your learning?**
The integrals on a plane was interesting and was a nice improvement on the classic calc 1 problem.
Which one of the following factors most influenced you to take this course?
Fulfillment of a requirement in your major or minor

What grade do you expect to receive?
A

What is your class standing?
First year

What is your sex?
Female

Question(s) Created by the Instructor for Individual Use

How has this course changed your perception of mathematics?
It has expanded what I had originally thought about math but not necessarily my perception of it.

What aspects of the course contributed most to your learning?
The weekly homework was the most helpful in understanding the material and what I didn't know about the material.
Which one of the following factors most influenced you to take this course?
Interest in the subject matter

What grade do you expect to receive?
A

What is your class standing?
First year

What is your sex?
Male

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Strongly agree
   Comments:
   Scott provided plenty of opportunities for students to involve themselves in the subject material both in and out of the classroom.

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Strongly agree
   Comments:
   Scott covered some subjects that I had already learned in high school, but his level of explanation helped me firmly grasp concepts both old and new. That being said, the course was certainly challenging but incredibly worthwhile.

3. The workload and pace of this course seemed appropriate.
   Strongly agree
   Comments:
   Thinking about math every day as I worked on weekly and daily homework assignments also helped me review and solidify the ideas covered in class.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Strongly agree
   Comments:
   Scott knows when he students will have questions about the material he is presenting and always makes time to stop and thoroughly answer them without running short on time at the end of class.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Strongly agree
   Comments:
   I would be surprised if someone in any of Scott's courses had a difficult time understanding his excellent presentation of the material.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:
   I frequently used office hours as a time to ask questions about the weekly homework and Scott was always willing to put down whatever he was working on at the time to fully answer my questions.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
   Strongly agree
   Comments:
   Tests were always returned in a timely manner and with useful corrections.
8. Overall, the instructor's teaching in this course was effective.

   Strongly agree

   Comments:
   Scott is a phenomenal math teacher.

   You are encouraged to use the space below to make any additional relevant comments concerning the
course or the instructor.

   Scott's excellent sense of humor helps maintain a calmness in class that facilitates learning despite the
occasionally rapid coverage of material in this course.

   Question(s) Created by the Instructor for Individual Use

   How has this course changed your perception of mathematics?
   It has made me far more comfortable with the main ideas and concepts that I began learning in Calc 1 as
   well as shown me the variety of uses that what we learned have in the real world.

   What aspects of the course contributed most to your learning?
   The weekly homework we an integral part of the course and pushed me to review the concepts that we
   reviewed over the course of the week. This let me see where I needed help the most, and therefore what to
   concentrate most on when studying for tests.
Which one of the following factors most influenced you to take this course?
Interest in the subject matter

What grade do you expect to receive?
A

What is your class standing?
Other

What is your sex?
Male

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Strongly agree
   Comments:

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Strongly agree
   Comments:

3. The workload and pace of this course seemed appropriate.
   Strongly agree
   Comments:

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Strongly agree
   Comments:
   Scott Taylor was always on top of his game by making sure the appropriate material was covered in class so that we would be able to do the homework and be prepared for the next class. We never strayed from the topic.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Strongly agree
   Comments:
   Yes, Scott was very articulate when explaining mathematics. His use of language was very helpful for my understanding. Also, his sense of humor engaged the students.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:
   The professor was always willing to help. He was always readily available.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
   Strongly agree
   Comments:

8. Overall, the instructor's teaching in this course was effective.
   Strongly agree
   Comments:
I especially enjoyed the life applications that were taught.

You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.

The course allowed me to see the complexity of mathematics and appreciate the importance of knowing why mathematics works. Scott Taylor was a great professor!

**Question(s) Created by the Instructor for Individual Use**

**How has this course changed your perception of mathematics?**
This course allowed me to see the complexity of mathematics. I was able to dig deeper into the well of knowledge and understand many of the fundamentals of calculus through various theorems. I thought it was interesting that many of the principle of calculus I still applied, even though they had to be altered. My perception of mathematics was changed by the fact that it is not always important to do the calculation, but it is important to know why or how mathematics works. In the world of computers, we don’t need to do every single calculation, but if we know why a theorem works, then we can program a calculator or computer to do the computation.

**What aspects of the course contributed most to your learning?**
The first aspect that contributed most to my learning was Scott’s teaching style. His use of language allowed for very articulate explanations. His sense of humor also made the class very enjoyable and engaging. Secondly, the daily and weekly homework provided a way to do mathematics constantly. This greatly aided my understanding because I was able to get lots of practice.
Which one of the following factors most influenced you to take this course?
Fulfillment of a requirement in your major or minor

What grade do you expect to receive?
B

What is your class standing?
First year

What is your sex?
Male

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
Strongly agree
Comments:
I worked so hard in this class!

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
Strongly agree
Comments:
This was the most challenging class I have ever taken.

3. The workload and pace of this course seemed appropriate.
Agree
Comments:
Sometimes the weekly assignments took more than 6 hours to complete.

4. Instructor’s organizational skills (including planning, preparation, and productive use of class time) were effective.
Strongly agree
Comments:
Always organized.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
Agree
Comments:
Sometimes you went a little too fast in class, but I was always able to see you in office hours afterwards for clarification.

6. The instructor was open to questions and willing to help outside of class time.
Strongly agree
Comments:
You scheduled a special class for individuals struggling in the class and it was extremely helpful! Thank you for that!

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
Agree
Comments:
The student graders sometimes were not the most constructive when they took points off on the weekly.

8. Overall, the instructor’s teaching in this course was effective.
Strongly agree
Comments:
I learned so much in this course.
You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.

Thank you for a great first semester! Happy Holidays!!

**Question(s) Created by the Instructor for Individual Use**

**How has this course changed your perception of mathematics?**
I learned that math is not so straight forward. There are multiple approaches to the same problem. It's like crime scene investigation. haha

**What aspects of the course contributed most to your learning?**
The fact that we had one assignment due at the end of the week forced me to manage my time wisely throughout the week.
Which one of the following factors most influenced you to take this course?
Fulfillment of a requirement in your major or minor

I think weekly homework assignments worked well for this course, they weren"t overly stressful and it wasn"t too much work at once.

**Question(s) Created by the Instructor for Individual Use**

**How has this course changed your perception of mathematics?**
I took a multi-variable calc course last year and only learned a few applications of concepts. This course, however, taught me the meaning behind the application and helped me to perceive how interconnected all areas of mathematics are.

**What aspects of the course contributed most to your learning?**
Studying for the tests contributed most to my learning. It was an opportunity to look back at everything we"d learned, piece it together, and get a better grasp of the concepts.
Which one of the following factors most influenced you to take this course?
Interest in the subject matter

Question(s) Created by the Instructor for Individual Use

**How has this course changed your perception of mathematics?**
It has definitely opened my eyes to the application of mathematics in the real world.

**What aspects of the course contributed most to your learning?**
I learned best by working through the homework and broadening my knowledge of the subject based on the foundation of what was talked about during lectures.
Which one of the following factors most influenced you to take this course?
Interest in the subject matter

What grade do you expect to receive?
A

What is your class standing?
First year

What is your sex?
Male

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Agree
   Comments:
   I went to all classes. Class decisions limited.

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Strongly agree
   Comments:

3. The workload and pace of this course seemed appropriate.
   Agree
   Comments:
   The assignments tended to be on the long side of the scale.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Agree
   Comments:

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   unanswered
   Comments:
   Assignments were confusing at times. The wording of questions confused me often and also professors at calc after-hours. The only way to get a straight answer was to go to Professor Taylor.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
   Neither agree nor disagree
   Comments:
   Just simple checks and x"c on homework"s.

8. Overall, the instructor's teaching in this course was effective.
   Agree
   Comments:
You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.

Question(s) Created by the Instructor for Individual Use

**How has this course changed your perception of mathematics?**
Taylor approximations give me an understanding of how mathematics are used to explain real life problems that there are not nice functions for.

**What aspects of the course contributed most to your learning?**
Doing problems out of the Book helped a lot on getting a better understanding on the material and practices. Something we didn’t do much of in the beginning which I wish we had.
Which one of the following factors most influenced you to take this course?
Interest in the subject matter

What grade do you expect to receive?
A

What is your class standing?
First year

What is your sex?
Female

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Strongly agree
   Comments:

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Agree
   Comments:
   Sometimes the information was confusing because it was presented in a much more theoretical way than it really is. When we reviewed for the exams it was much more straightforward than it had been presented the first time.

3. The workload and pace of this course seemed appropriate.
   Agree
   Comments:
   The problem sets sometimes took me more than six hours

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Strongly agree
   Comments:

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Neither agree nor disagree
   Comments:
   Sometimes Scott was too obsessed with the board looking perfect rather than presenting the math. He would often write words such as "recall that" or "thus" that he could have just said and then written down on the board whatever math followed.

6. The instructor was open to questions and willing to help outside of class time.
   Agree
   Comments:
   He was very available during office hours and was flexible with appointments. The only thing was that when people asked questions in class he would get kind of confused trying to answer them. It sometimes seemed like he prepared for the lecture of class, but if a question went outside the topics he became overwhelmed and didn't know how to answer it clearly.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
   Agree
   Comments:
8. Overall, the instructor's teaching in this course was effective.

Agree

Comments:

Question(s) Created by the Instructor for Individual Use

How has this course changed your perception of mathematics?
That math is more than just a set of formulas - that it is within surprisingly close reach to understand things in everyday life, like rainbows!

What aspects of the course contributed most to your learning?
Surprisingly, working with other people and group activities. Homework sometimes provided this opportunity, but that recent class where we worked in a group stood out!
Course Evaluation - Individual Responses  
MA122  C  
FA 2011  
Survey Submit Time: 2011-12-09 14:46:08.795:30435  

Which one of the following factors most influenced you to take this course?  
Fulfillment of an all-college area requirement  

What grade do you expect to receive?  
B  

What is your class standing?  
First year  

What is your sex?  
Male  

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).  
Agree  
Comments:  
Involvement was necessary due to the pace and course load.  

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.  
Agree  
Comments:  
The course was very challenging and intellectually stimulating, however, trying to absorb information was difficult, as the textbook and lectures were not often taught the same way (i.e., differing notation, differing formulae, etc.)  

3. The workload and pace of this course seemed appropriate.  
Agree  
Comments:  
The workload was heavy, but necessary.  

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.  
Neither agree nor disagree  
Comments:  
Lectures were generally efficient in presenting enough information in a 50 minute period, although typos on the homework were rather frequent and frustrating.  

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.  
Neither agree nor disagree  
Comments:  
Some topics were presented well, others were not clear, often due to differences between presentation of information between lectures & textbook.  

6. The instructor was open to questions and willing to help outside of class time.  
Agree  
Comments:  

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.  
Agree  
Comments:  

8. Overall, the instructor's teaching in this course was effective.  
Agree  
Comments:  

Proofs, theories, and ideas used to back up the mechanics of calculus made the course more enriching than my AP AB calc course in high school.

You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.

Question(s) Created by the Instructor for Individual Use

How has this course changed your perception of mathematics?

What aspects of the course contributed most to your learning?
Which one of the following factors most influenced you to take this course?

Interest in the subject matter

What grade do you expect to receive?

B

What is your class standing?

First year

What is your sex?

Male

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).

   Strongly agree

   Comments:

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.

   Strongly agree

   Comments:

   Very difficult, but I learned tons. Thank you Scott.

3. The workload and pace of this course seemed appropriate.

   Neither agree nor disagree

   Comments:

   A little hard on the homework. It helped, but sometimes it was basically the same problem over again and took a considerable amount of time.

4. Instructor’s organizational skills (including planning, preparation, and productive use of class time) were effective.

   Strongly agree

   Comments:

   Good teaching. Keep doing example problems to show us how you apply the material.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.

   Strongly agree

   Comments:

6. The instructor was open to questions and willing to help outside of class time.

   Strongly agree

   Comments:

   Good amount of office hours. Those were really useful and thank you for being willing to work for a while one on one to make sure the material was learned.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.

   Neither agree nor disagree

   Comments:

   Graders were sometimes a little inconsistent, but from the teacher it was consistent.

8. Overall, the instructor's teaching in this course was effective.

   Strongly agree

   Comments:

   Thank you Scott!! Hope to see you sometime in the future!
You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.

Question(s) Created by the Instructor for Individual Use

How has this course changed your perception of mathematics?
It has showed me that there is tons more to learn and made me more interested in learning all of it.

What aspects of the course contributed most to your learning?
homework, class time, and working with other students
Which one of the following factors most influenced you to take this course?
Interest in the subject matter

What grade do you expect to receive?
B

What is your class standing?
First year

What is your sex?
Male

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Agree
   Comments:

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Agree
   Comments:

3. The workload and pace of this course seemed appropriate.
   Agree
   Comments:

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Agree
   Comments:

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Agree
   Comments:
   Occasional tangents on the material were a little confusing, but difficult to avoid when trying to explain such a broad topic. Overall a very effective communicator.

6. The instructor was open to questions and willing to help outside of class time.
   Agree
   Comments:

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
   Agree
   Comments:

8. Overall, the instructor's teaching in this course was effective.
   Agree
   Comments:
You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.

I ended up dropping down to 122 from 161, and struggled in the beginning to get caught up. But once I got caught up I really enjoyed this course. When signing up for courses it was not very clear to me that 161 was equivalent to 121 not 122.

**Question(s) Created by the Instructor for Individual Use**

**How has this course changed your perception of mathematics?**
This course has made me realize that not all mathematics is absolute, and that problems can be approached in several different manners.

**What aspects of the course contributed most to your learning?**
I would say that the problem sets contributed most to my learning, especially the problems out of the book. It would have been nice to have more problems out of the book on the problem sets, I found that I learned more when I could check my answers in the back of the book, and find my mistakes.
Which one of the following factors most influenced you to take this course?

Fulfillment of a requirement in your major or minor

What grade do you expect to receive?
B

What is your class standing?
First year

What is your sex?
Female

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Agree
   Comments:

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Agree
   Comments:
I found the course challenging in the beginning and was demoralized by my first homework grades and I started to feel like I was not going to succeed in the course but it gradually got better and I started enjoying some of the coursework.

3. The workload and pace of this course seemed appropriate.
   Agree
   Comments:
I think the pace was good, it was neither too fast nor too slow. I was however often overwhelmed by the amount of homework we got. Even if you decided to get started on your homework early you would not be able to work through it because the material you need to do it will be taught to you a couple of days or even a day before the homework is due.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Agree
   Comments:
His classes were well planned. he always gave us an indication of where the course is going and what material we will cover and when. For every class he would give an outline of what we would be doing.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Agree
   Comments:
In the beginning I found it hard to understand him but gradually I got used to his teaching style and the what he expected from us.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:
He was definitely the most open and available of my professors. He encouraged us to come and talk to him about homework problems or just Math in general. I liked how he would hold review sessions, have office hours, come to Calculus after hours or you could make an appointment with him. This definitely worked well for me because I feel more comfortable in smaller class sizes and he may have noticed that I participate more and grasp the material more quickly in the smaller review sessions than during ordinary class. He is personally involved with his students and if you do not do well he is willing to talk to you on a one on one basis.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
Agree
Comments:
I really appreciated his grading system. He gave you credit for showing that you understand the question and the concepts behind it even if you do not succeed in coming up with the right answer. Definitely a fair grader.

8. Overall, the instructor's teaching in this course was effective.
Agree
Comments:
You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.

Proffesor Scott was extremely open and was always willing to help. I found this quite endearing.

Question(s) Created by the Instructor for Individual Use

How has this course changed your perception of mathematics?
In the beginning of the course I was confused but eventually when I got to understand the material it was wonderful. I had never really thought of approximations in Math but after this course I am fully aware of it. Also working in 3D was something new for me and this course helped me visualize functions and Math problems in a new and exciting way.

What aspects of the course contributed most to your learning?
The section on series has contributed most to my learning because it was something completely new and challenging to me.
Which one of the following factors most influenced you to take this course?
Fulfillment of a requirement in your major or minor

What grade do you expect to receive?
B

Agree
Comments:

You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.
I felt like during class that Scott moved too quickly through the subject matter on the board. I spent most of my time rushing to write down what was on the board, and not enough time listening to his commentary. Felt like he could of mirrored the book and its examples more to allow for less written notes, or if he could have told us which examples to prioritize.

**Question(s) Created by the Instructor for Individual Use**

**How has this course changed your perception of mathematics?**
I enjoyed our last section about multi-variable integration the most. Found it challenging but fun to the homework. Would defiantly want to do a geometry-centered or influenced math course in the future.

**What aspects of the course contributed most to your learning?**
The homework helped a lot by forcing me to revisit the subject matter and review it.
Which one of the following factors most influenced you to take this course?

Fulfillment of a requirement in your major or minor

What grade do you expect to receive?

Question(s) Created by the Instructor for Individual Use

How has this course changed your perception of mathematics?
Mathematics is more challenging, thoughtful, and creative than I thought before.

What aspects of the course contributed most to your learning?
The most important things I learned in the class were that mathematics is time consuming, and if a problem doesn't work, try again. There's a lot of creativity involved in solving problems and that it's essential to understand both how to use a method and why it works. I thought I was an in depth class for the amount of material we covered, I liked going into the details of Taylor Polynomials (even though we really just skimmed the surface).
Which one of the following factors most influenced you to take this course?
Fulfillment of a requirement in your major or minor

What grade do you expect to receive?
A

What is your class standing?
First year

What is your sex?
Male

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).

The only complaint would be the mistakes in the homeworks. The typo's can be very frustrating to have to deal with when attempting to solve problems.

Question(s) Created by the Instructor for Individual Use

**How has this course changed your perception of mathematics?**
It has allowed me connect a lot of the smaller Calc 1 subject matter into broader more useful things.

**What aspects of the course contributed most to your learning?**
The use of calc 1 techniques in calc 2 and also the constant practice with the weekly homework problem sets.
Which one of the following factors most influenced you to take this course?
Interest in the subject matter

What grade do you expect to receive?
A

What is your class standing?

   Comments:
Question(s) Created by the Instructor for Individual Use

How has this course changed your perception of mathematics?
I think the concepts in multi-variable calculus paralleled the concepts from Calc I in such a way that I do not really feel they changed my perception of calculus, they more just gave me the tools to use calculus more effectively. However, the segment of the course on Taylor polynomials really changed my perception of mathematic. Math has always been the most black and white subject of them all for me, and the concept that very, very good estimates are just as good as perfect precision changed my perception of math.

What aspects of the course contributed most to your learning?
The weekly homework assignments and the in class notes contributed to my learning the most.
Which one of the following factors most influenced you to take this course?
Fulfillment of a requirement in your major or minor

What grade do you expect to receive?
B

What is your class standing?
Sophomore

What is your sex?
Female

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Strongly agree
   Comments:
   I devoted a lot of time outside of class towards studying, discussion session, and on homework sets

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Strongly agree
   Comments:

3. The workload and pace of this course seemed appropriate.
   Strongly agree
   Comments:
   For someone who isn't a "math person" the course was very challenging; however, the workload and time commitment was appropriate for what needed to be accomplished.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Agree
   Comments:

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Agree
   Comments:
   Occasionally, lecture seemed to harp on one idea, only to leave very little time to finish up the lecture. Out of class explanations proved most helpful.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:
   Easily the most accessible professor I've ever had - the professor went above and beyond in terms of offering extra help.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
   Agree
   Comments:

8. Overall, the instructor's teaching in this course was effective.
   Agree
   Comments:
You are encouraged to use the space below to make any additional relevant comments concerning the course or the instructor.
Considering that I often struggle with math, this course forced me to pour so much effort and time into it. However, I definitely feel like the professor was very dedicated and exceptionally willing to help students succeed.

Question(s) Created by the Instructor for Individual Use

**How has this course changed your perception of mathematics?**
Mathematics had always been, for me, about finding the proper formula and methodically plugging through the work. This course, however, introduced broader concepts and an overarching emphasis on learning one skill and applying it to later learning ideas.

**What aspects of the course contributed most to your learning?**
The professor"s availability outside of lecture was key; he was incredibly helpful with one-on-one questions or group discussions - this is where I made the real connections with material. Also, his organization of lecture by demarcating proofs, examples, etc. helped to clarify concepts.
Which one of the following factors most influenced you to take this course?
Fulfillment of a requirement in your major or minor

What grade do you expect to receive?
A

What is your class standing?
First year

What is your sex?
Female

1. I was involved in this course (for example, I attended class regularly, I worked hard, and I participated in class discussions and activities).
   Agree
   Comments:

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Strongly agree
   Comments:

3. The workload and pace of this course seemed appropriate.
   Strongly agree
   Comments:

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Agree
   Comments:
   Got much better the second half of the course

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Neither agree nor disagree
   Comments:
   I thought he was a little vague where he should have spent more time. the examples we do in class are usually wither way too simple or way too complex to be able to apply them to the level of problem we were responsible for. It was thus, hard to take the lessons and notes taken in class and understand exactly how they applied to the homework or test. Then, especially at the beginning of the course when his teaching style was still new, he used a lot of new and different variables that I felt really really hard to understand. I think he needs to spend more time defining the variables as he uses them in terms that would make sense to the incoming class, all the variables. I really liked how he pushed us in class, teaching us very difficult material which was much beyond what he tested us on. We were able to explore truly in depth concepts but didn"t punish us if we didn"t totally understand it. He obviously wanted us to succeed which I appreciated.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:
   He was so sweet and willing to help whenever he could. No question was a stupid question which made it much easier to clarify things like variables as the course went on.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.
   Agree
Comments:

8. Overall, the instructor's teaching in this course was effective.
