Especially the part involving set theory, functions, sequence, and cardinality, and the corresponding homework usually takes much more time to finish.

3. The workload and pace of this course seemed appropriate.
Agree
Comments:
Though sometimes the weekly homework seemed a bit daunting, overall the amount of work is appropriate and I have to say that some parts of this course material do need a lot of exercises.

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Agree
   Comments:
   This course was very challenging for me because I've never approached math so abstractly. It made me appreciate math and those who enjoy abstract math, but it was too abstract for my taste. That being said, I did learn a lot and I gained a new appreciation for mathematics.

3. The workload and pace of this course seemed appropriate.
   Agree
   Comments:
   The workload in this course was very demanding. I might suggest just two homework assignments per week instead of three, or fewer problems per problem set (maybe more journal problems and less proofs to ensure concept understanding). That being said, I do think that the amount of homework did contribute to my overall understanding of the subject.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Agree
   Comments:
   I would have liked to have spent more time in class understanding challenging homework problems, rather than seeing very complex proofs in class that we would never be asked to do on an exam.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
Strongly agree
Comments:
I worked harder for this class than I've worked for any other class. It taught me so much and really kept me on my toes intellectually. I appreciate that more than I can express.

3. The workload and pace of this course seemed appropriate.
Strongly agree
Comments:
As Professor Taylor mentioned throughout the class, while the workload is extensive, it is one of the only ways to effectively learn the material from class. I felt very challenged but in a way that pushed me to think differently and work in ways I didn't know I could.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
Strongly agree
Comments:
Rarely would I think class time was ill-spent. I feel like we reviewed what we needed to and learned everything we need to effectively.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
Strongly agree
Comments:
Professor Taylor pushed us to think critically but in the event we were truly lost or stuck, he guided us in a way that allowed for us to learn. I think that this was the most effective way he could have helped us without simply giving us the answers.

6. The instructor was open to questions and willing to help outside of class time.
Strongly agree
Comments:
Professor Taylor was available often to help outside of class and worked hard to meet the needs of students. TA hours were held regularly as well which were productive and helpful. Anytime I felt the need to meet with Professor Taylor about most anything, he was accommodating and easy to talk to.
7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.

As I had mentioned before in this evaluation, this class has been the class in which I've done the most work I've ever done. It has taught me diligence and hard work, two things that I think are fundamentally important not only in a mathematics class but also in the world past academics. My parents have always told me that I should strive to learn how to work hard, and this class has provided me with the opportunity to do so. While I was sometimes unconfident with the material, resources were almost always available to aid me in understanding. I am very proud of myself for the work I've done this semester, albeit not perfect, but I have been able to apply myself to an extent that I had not before and I appreciate that to an extremely high degree. I very much hope that I will be able to take another class with Professor Taylor during my remaining time at Colby.

   Strongly agree
   Comments:

3. The workload and pace of this course seemed appropriate.
   Disagree
   Comments:
   I feel a though Professor Taylor underestimates how long his homework takes. He says in his syllabus to "Do Math Everyday" and I spent at least two hours a day working on his homework. On average, I spent about 10 hours per homework. That didn"t leave much time to continually study the material.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Strongly agree
   Comments:

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Strongly disagree
   Comments:
   Professor Taylor did not really teach me much. He relies on us learning the bulk of the material from the book and then tie up any loose ends in class the following day. This method of teaching just does not work for me. I could have learned just as much if I had taken an independent study and spent my time going through the book thoroughly. I feel as though lecture is quite useless.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:
   Professor Taylor was always able and willing to help outside of class time. This is highly appreciated.

   I participated in class and out of class with TA sessions and office hours.

2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Strongly agree
   Comments:
   This was definitely a challenging course for me since this kind of math is not very intuitive for me. Abstract math was not something I was not familiar with and it conceptually was very difficult throughout the semester but also very satisfying when you were able to get something completely correct.

3. The workload and pace of this course seemed appropriate.
   Neither agree nor disagree
   Comments:
   There was a lot of work for this course. I think it would have been way more helpful to learn the concepts ahead of the homework than do our homework on our own rather than be expected to do a HW Friday, Monday, and Wednesday for the following class before we had really done that portion of the material. It made it a lot trickier towards the end of the year when you had to go through HW corrections and try and get those right because that is what you use to study off of.
