2. I found this course challenging and intellectually stimulating, and I learned a considerable amount.
   Strongly agree
   Comments:
   While this class was pretty challenging, I certainly learned a considerable amount of mathematics. I liked the idea of being able to rewrite homework because not only did that help my grade, but it also helped me understand the proofs much better.

3. The workload and pace of this course seemed appropriate.
   Neither agree nor disagree
   Comments:
   At times the amount of work for this class combined with all of my other classes was a lot to handle, especially when we are introduced to entirely new concepts in the homework. I think in the future, maybe you could give us a rough sketch of all proofs that you want us to think about for the homework and we can fill in the details later. For some of the homework problems, I had no idea where to start because we haven't touched on those concepts in class.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.
   Agree
   Comments:
   I liked the way class was structured where we went through rigorous proofs, but the timing of certain proofs we have done were not great at certain times. For example, with the proof about bijective sequences (Theorem 7.4.3 I believe), I think we should have spent more time talking about it in class before we were assigned it for homework. I understand that you wanted us to really think about this one for ourselves, but I think it would've been better if you gave us a rough sketch of that proof in class before we do it for homework and then we can fill in the rest of the details afterwards.

5. The instructor's communication skills (for example, presentation of material, facilitation of discussion, and clarity of expectations) were effective.
   Strongly agree
   Comments:
   I think you did a great job overall teaching us how to do mathematical proofs, which are very difficult.

6. The instructor was open to questions and willing to help outside of class time.
   Strongly agree
   Comments:
You were extremely helpful during office hours because I could ask you any question I wanted and I would be satisfied with the answer you gave me and I would understand the material much better.

7. The instructor's assessment of student work was prompt, consistent, useful, and substantive.

Disagree

Comments:
Throughout the semester, you have done a good job evaluating us using the examlets and the exam. In fact, I like the fact that you split up the first exam over several weeks throughout the semester because it made it much easier to think about and understand certain proofs each week rather than try and understand all of them at once before an exam. However, I put disagree here because I think the homework could have been graded much more fairly. For example, I have received 0/5 for some of the credit problems where they are suppose to give us credit for making a reasonable attempt at it. Also, some of the graders graded the proofs far too harshly. On proofs I should've gotten an 8/10, I received a 4/10. Yes, I understand the concept of rewrites, but I don’t necessarily have time to do the rewrites every week because of my other coursework.

8. Overall, the instructor's teaching in this course was effective.

Strongly agree

Comments:
This course was very rigorous, which really made me understand the concepts of this course.

Sometimes I can't catch up with the class pace and I think there are a lot of other students who have the same problem. A way to solve this is to include a handout or a summary of notes of the class so that students could focus on each step rather than busy writing down all the notes. Personally I can't focus on thinking about the steps when I am writing down stuff.

   I think that this course was incredibly difficult, but I do think that I learned a lot over the course of the semester.

3. The workload and pace of this course seemed appropriate.
   Neither agree nor disagree
   Comments:
   I think it is difficult to comment on the workload of this class. It often felt like the workload in this class was equivalent to the workload of about two of my other classes. At the same time, I can't really think of a way to decrease the workload and still get as much out of the course. I think that a lot of learning did come from trying to work through a proof on my own, which inevitably takes a lot of time. Also, while it did take a lot of time to do rewrites on the homework, I think that this was really valuable and I appreciated that we got the chance to look over proofs that we had gotten wrong.

4. Instructor's organizational skills (including planning, preparation, and productive use of class time) were effective.

Comments:
He graded things very quickly and there was always useful feedback provided on assignments. The feedback was extremely helpful, especially for rewrites on homework.

8. Overall, the instructor's teaching in this course was effective.
Strongly agree

Comments:
I think that the examlets that we had each week were very helpful for staying on top of the material and definitions, which is vital to this course. Also, I know that one thing I struggled with in this course was the terminology, which was very new to me. I think that maybe going a little slower in the beginning and going over some of the terminology more would have been helpful.
